## TABLEAU COURSES AVAILABLE

### **TABD01G - Tableau Desktop I - Fundamentals (2 days in-class)**

This course is designed to help you understand and use the important concepts and techniques in Tableau to move from simple to complex visualizations and learn how to combine them in interactive dashboards.

### **TABD02G - Tableau Desktop II: Intermediate (2 days in-class)**

This course is designed to provide you with the skills required to become a Tableau power user. It's made for the professional who has solid working experience with Tableau and wants to take it to the next level.

### **TABD12G - Tableau Desktop I & II: Accelerated (3 days in-class)**

This course is designed to make power users out of absolute beginners. It combines topics from both the Tableau Desktop I and II courses into a 3-day data bootcamp.

### **TABD03G - Tableau Desktop III: Advanced (2 days in-class)**

This course teaches advanced uses for calculations by applying them to real world scenarios. Get a better grasp of advanced building techniques and complex data visualization tips for creating innovative analysis and dashboards.

### **TABS05G - Tableau Server Administration (2 days in-class)**

This course provides an in-depth coverage of Tableau Server Administration, where students will learn the knowledge and skills to administer a Tableau Server installation, including managing content, users and permissions.

### **TABS06G - Tableau Server Architecture (3 days in-class)**

This course provides in-depth coverage of Tableau Server architecture and configuration. The knowledge and skills acquired are best geared toward those architecting and administering a large or complex deployment of Tableau Server.

### **TABP1G - Tableau Prep I (2 days in-class)**

This course is designed to provide students with the tools and knowledge of how to prepare and shape data in Tableau Prep. It's best suited for students who have 3-6 months experience in Tableau Desktop and are somewhat familiar with writing calculations.

### **TABVA1G - Visual Analytics (2 days in-class)**

In this course, you will learn to design visualizations that effectively share information and insights with others. This course will strengthen your understanding of visual best practices. This course uses Tableau to develop and discuss visualizations, but does not include instruction on how to use Tableau products.
